**Description of Project:**

The long-term objective for this project is to engage employers in the San Diego and Imperial counties to provide students with increased work-based learning and job placement opportunities. Additionally, this project will help to establish a relationship with employers for feedback regarding the SDICCCA Career Education (CE) programs. This project aims to support SDICCCA colleges and/or the Regional Consortium by: (Please describe the proposed project)

**What needs motivate this project and how will the project address these needs?**

Regional needs: Employers have difficulty filling jobs due to a lack of qualified applicants. Employers report that students do not have the needed job readiness skills or soft skills. These skills can include adaptive, analysis/solution mindset, collaboration, communication, digital fluency, an entrepreneurial mindset, empathy, resilience, self-awareness, and social/diversity awareness. The San Diego and Imperial Counties community colleges have made it a priority to develop more indepth relationships with employers with the intent of better understanding the needs of employers in order to align curriculum with the labor market. Additionally the region would like to know who the employers are within each sector and request their participation in providing work-based learning opportunities and employment.
