Step Up to the Future with

Licensed Vocational Nursing

Licensed Vocational Nursing

Step up to the Future!

Employment Outlook

Employment of LVNs is expected to continue to grow strongly in response to the growth of an increasingly elderly population. As the current nursing workforce ages, replacement needs will be a major source of job openings. Employment of LVNs in nursing care facilities and home healthcare will continue to grow, due to patients being rapidly discharged from hospitals while still in need of nursing care, teaching and other healthcare support. Additional opportunities for jobs in clinics and outpatient care centers will emerge as more medical procedures are carried out in outpatient settings.

What Does an LVN Do?

Licensed Vocational Nurses care for patients in clinics, long-term care facilities, doctors' offices and hospitals under the direction of registered nurses. In clinical settings, LVNs provide bedside care, administer medications, apply dressings, treat wounds and perform a variety of invasive procedures. In doctors' offices and clinics, LVNs may also have clerical responsibilities as well as their nursing roles. In home and hospice care settings, LVNs may teach family caregivers basic nursing tasks and show them how to care for their loved ones.

Personal Characteristics and Working Conditions

- Caring and sympathetic nature
- Observant with good critical thinking skills
- Calm demeanor with emotional stability
- Detail oriented
- Ability to follow directions
- Good communication skills
- Ability to work independently as well as with a team
- Manual dexterity with mechanical aptitude
- Computer literate
- Fluency in a second language helpful
- Good physical stamina; ability to be on feet most of the day
